SUMMARY

As a motivated Full Stack Web Developer skilled in the MERN stack, I aim to leverage my technical expertise and problem-solving abilities to build efficient, scalable web applications that address business needs and enhance user experiences. With a proactive approach, I strive to contribute to organizational success and create impactful digital solutions.

EXPERIENCE

MERN Full stack Developer Internship (01/2025 – Present)

(Unified Mentor Pvt. Ltd)

- Created a Full Stack **(Book Purchase App)** [Github Link](#) – Designed a seamless user experience with React.js and handled backend operations using Express.js. Enabled secure payment gateway integration and implemented a dynamic book inventory using MongoDB.
- Developed and deployed a Full Stack **(Contact Manager App)** [Github Link](#) – Built a responsive interface using React.js, implemented RESTful APIs with Node.js, and managed data with MongoDB. Integrated user authentication and CRUD operations for efficient contact management.

Backend Developer Internship (10/2022 – 01/2025)

(sharpenr.tech)

- Developed and maintained high-performance backend systems, resulting in a 15% increase in website traffic and conversion rates.
- Build and maintained RESTful APIs that increased the number of property listings by 25%.
- Created two backend projects –
 1. **Expense Tracker App** [\(Github Link\)](#) - Managed daily user expenses, implemented CRUD operations handled by MySQL database. Deployed the project on AWS.
 2. **Group Chat App** [\(Github Link\)](#) - Implemented user authentication, group creation, and chat functionality similar to WhatsApp. Added admin capabilities for group management. Established relational database models, including one-to-many and many-to-many relationships

Process Engineer (Sundaram Steel Pvt. Ltd. Bokaro) 2021-2022

Production Engineer (RIJ Engineering Pvt. Ltd. Pune) 2016-2021
